

# Memo Minder

---

## Features

Motion activated infrared care device that senses the user and plays your pre-recorded reminder.

Record a clear, digital message or warning in a familiar voice of up to 20 seconds long for your loved one.

This memo minder helps your loved ones to remember to do the things they might forget. "Use your door chain before you open the door", "Have you taken your pills today?", "Have you switched the oven off?"

Strategically place multiple devices all around the home to give personalised prompts. Place them by the door, the exit of the kitchen and bathrooms.

## Why Argenti?

We focus on using the latest digital and mobile technology to enable people to feel safe, secure and independent, giving them the freedom to live the life they choose. Our service is already benefiting over 18,000 customers across the South East.
