

MemRabel 2

What is it?

The MemRabel 2 supports people with failing memory to live independently at home and in care. The device allows a family member or health visitor to set daily reminders using voice and picture or video alarms to prompt a person to complete daily tasks. Over 120 pre-installed audio, picture, and video reminder files are available.

How does it work?

Personal reminders can be created, combining images and audio (voice), or video, which can be added to the MemRabel library.

An unlimited number of reminders can be set for daily, weekly, monthly and yearly playback. At pre-set times the selected voice reminder, with an accompanying screen graphic or video, is played back on the screen. Voice reminders can be set to auto-repeat at 5 to 25 minute intervals.

Features

- ✓ Offers peace of mind for carers
- ✓ Promotes independent living
- ✓ Improves self-esteem and confidence
- ✓ Plays personalised voice or video messages
- ✓ Over 120 pre-installed reminders
- ✓ Create unlimited personalised reminder messages
