

Property Exit Sensor

What is it?

The property exit sensor is designed to monitor the safety of people with cognitive impairments who may be prone to leaving their homes for extended periods at inappropriate times of the day or night, putting themselves at risk.

Who is it for?

The property exit sensor can be used to provide flexible solutions for independent living, whether in sheltered accommodation or individual dwellings. The system has many benefits, including helping people living with dementia to live safely and independently in the community. It allows appropriate action to be taken as quickly as possible to ensure the user is returned to a safe environment. It can also help to alleviate the emotional and physical stress of caring for someone who may leave their home and be unable to return unassisted.

How does it work?

The property exit sensor is located above the door and comprises a PIR (Passive Infrared) movement detector, door contacts and a Telecare Interface Module which together detect if someone has walked out of the door and not returned. The alarm can be set to activate for certain periods of the day, and will raise an alarm to either a carer (pager) or the monitoring centre (Lifeline unit).

A call will also be raised if the monitored door has been left open for a specified period of time to ensure building security and client safety.

The property exit sensor can also be used in conjunction with optional lighting controllers in order to turn on an outside light to help reduce the risk of falling.

Features

- ✓ Transmits on the dedicated European 869MHz social alarm frequency for reliable, future proofed operation
- ✓ Wireless radio technology for flexible installations
- ✓ Automatic low battery warning ensuring optimum operation at all times
- ✓ Optional lighting control function to turn on an outside light in order to help prevent the risk of falling

Benefits

- ✓ **Allows the main carer to override pre-set timings**, avoiding unnecessary recurring calls to the response centre when visiting a client during times when the sensor is active
- ✓ **Flexible monitoring times** that meet individuals' needs
- ✓ **Automatic alarm function** if a door is left open -ensuring user safety at all times

Why Argenti?

We focus on using the latest digital and mobile technology to enable people to feel safe, secure and independent, giving them the freedom to live the life they choose. Our service is already benefiting over 18,000 customers across the South East.
