

Bogus Caller Button

What is it?

The bogus caller button is similar to other 'red button' alerts. It allows the user to discreetly request assistance from a 24/7 monitoring centre if they are worried by a stranger at the door or noises at night. The device is typically fitted by the front door, but it can be situated anywhere within the home.

Why Argenti?

We focus on using the latest digital and mobile technology to enable people to feel safe, secure and independent, giving them the freedom to live the life they choose. Our service is already benefiting over 18,000 customers across the South East.

Benefits

- ✓ **It requires a Lifeline Unit** to link to the 24/7 monitoring centre
- ✓ **Three emergency responders** (friends, family and carers who live close by) can be registered with the monitoring centre
- ✓ **Quick response** from your responders, or escalation to emergency services if necessary
- ✓ **Recording of conversations** when an alert has been raised, comes as standard
